

LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Previously presented) A method of treating a cancer in a mammal comprising administering to a mammal in need thereof an amount of a mimetic of an enzymatic scavenger of reactive oxygen species sufficient to effect treatment of said cancer,

wherein said mimetic is of formula I or II

I

II

wherein

each R is, independently, a C₁-C₈ alkyl group.,

each A is, independently, hydrogen or a halogen,

M is a metal selected from the group consisting of manganese, iron, copper, cobalt, and nickel, and

Z is a counterion.

2-4. (Canceled).

5. (Previously presented) The method according to claim 1 wherein said mimetic is of formula I.

6. (Canceled).

7. (Previously presented) The method according to claim 5 wherein said metal is manganese.

8. (Canceled).

9. (Previously presented) A method of treating a cancer in a mammal comprising administering to a mammal in need thereof an amount of 10112, 10113, 10123, 10143, 10150, 10151, 10153, 10158 or 10201 sufficient to effect treatment of said cancer.

the formula I or II.

or, when said compound bears a charge, a pharmaceutically acceptable salt thereof, wherein

R_1 and R_3 are the same and are:

R_2 and R_4 are the same and are:

Y is halogen or $-CO_2X$, and

X is the same or different and is an alkyl and each R_3 is the same or different and is H or alkyl, and wherein when said mimetic is off the formula II, M, is a metal selected from the group consisting of manganese, iron, cobalt, copper, and nickel.

11. (Withdrawn) A method of protecting normal tissue of a mammal from the toxic effects associated with gene therapy, immunotherapy, radiotherapy or chemotherapy comprising administering to a mammal in need thereof an amount of a mimetic of an enzymatic scavenger of reactive oxygen species sufficient to effect said treatment.

12. (Withdrawn) The method according to claim 11 wherein said mimetic is a mimetic of superoxide dismutase (SOD), catalase or peroxidase.

13. (Withdrawn) The method according to claim 12 wherein said mimetic is a mimetic of SOD.

14. (Withdrawn) The method according to claim 11 wherein said mimetic is a methine substituted porphine or substituted tetrapyrrole, or pharmaceutically acceptable salt thereof.

15. (Withdrawn) The method according to claim 11 wherein said mimetic is bound to a metal.

16. (Withdrawn) The method according to claim 15 wherein said metal is selected from the group consisting of manganese, iron, cobalt, copper, nickel and zinc.

17. (Withdrawn) The method according to claim 16 wherein said metal is manganese.

18. (Withdrawn) The method according to claim 17 wherein said mimetic is a manganese bound methine substituted porphine.

19. (Withdrawn) The method according to claim 18 wherein said mimetic is 10110, 10111, 10112, 10113, 10123, 10143, 10150, 10151, 10153, 10158 and 10201.

20. (Withdrawn) A method of preventing cancer or preventing the recurrence of cancer in a mammal comprising administering to a mammal in need thereof an amount of a mimetic of an enzymatic scavenger of reactive oxygen species sufficient to effect said treatment.

21. (Withdrawn) The method according to claim 20 wherein said mimetic is a mimetic of superoxide dismutase (SOD), catalase or peroxidase.

22. (Withdrawn) The method according to claim 21 wherein said mimetic is a mimetic of SOD.

23. (Withdrawn) The method according to claim 20 wherein said mimetic is a methine substituted porphine or substituted tetrapyrrole, or pharmaceutically acceptable salt thereof.

24. (Withdrawn) The method according to claim 20 wherein said mimetic is bound to a metal.

25. (Withdrawn) The method according to claim 24 wherein said metal is selected from the group consisting of manganese, iron, cobalt, copper, nickel and zinc.

26. (Withdrawn) The method according to claim 25 wherein said metal is manganese.

27. (Withdrawn) The method according to claim 26 wherein said mimetic is a manganese bound methine substituted porphine.

28. (Withdrawn) The method according to claim 27 wherein said mimetic is 10110, 10111, 10112, 10113, 10123, 10143, 10150, 10151, 10153, 10158 and 10201.

29. (Previously presented) The method according to claim 1 wherein each A is hydrogen.

30. (Previously presented) The method according to claim 9 wherein 10113 or 10150 is administered.

31. (Previously presented) The method according to claim 30 wherein 10150 is administered.

32. (Previously presented) The method according to claim 10 wherein said mimetic is of formula II and M is manganese.
